

Our Company

Abita Shades Ltd is the natural sequence of our old family business tradition in the manufacturing of tarpaulin & tents. We are currently the third generation.

Abita Shades Ltd is specialized in indoor & outdoor sun shading products. Down the years we have broaden our products from basic 'tarpaulin & tents' to trendy window coverings and sophisticated outdoor installations.

Your 'one stop' shop for sun shading solutions.

We are today serving the Indian Ocean islands & part Africa by our partners or direct selling.

The challenge for our tropical climate remains UV rays, strong winds, heavy rains and the ever changing world climatic conditions. That's why we are always working with our international raw materials partners to deliver the most durable & eco friendly products to preserve our sustainable islands living.

We have today a portfolio of different kinds of customers ranging from experimental outdoor living to exquisite villas. We also service corporates as well as governmental bodies.

Our brand 'abita' & 'idOmbra' are known for tailor made products, where we work hand in hand with home owners, architects, designers, project managers & construction companies.

Our 'across the border' experiences do give us an edge to better serve the region.

We also act as distributor for our raw materials.
